

The ultimate water treatment system.

The Hydro-Quad® The Silent Maid™

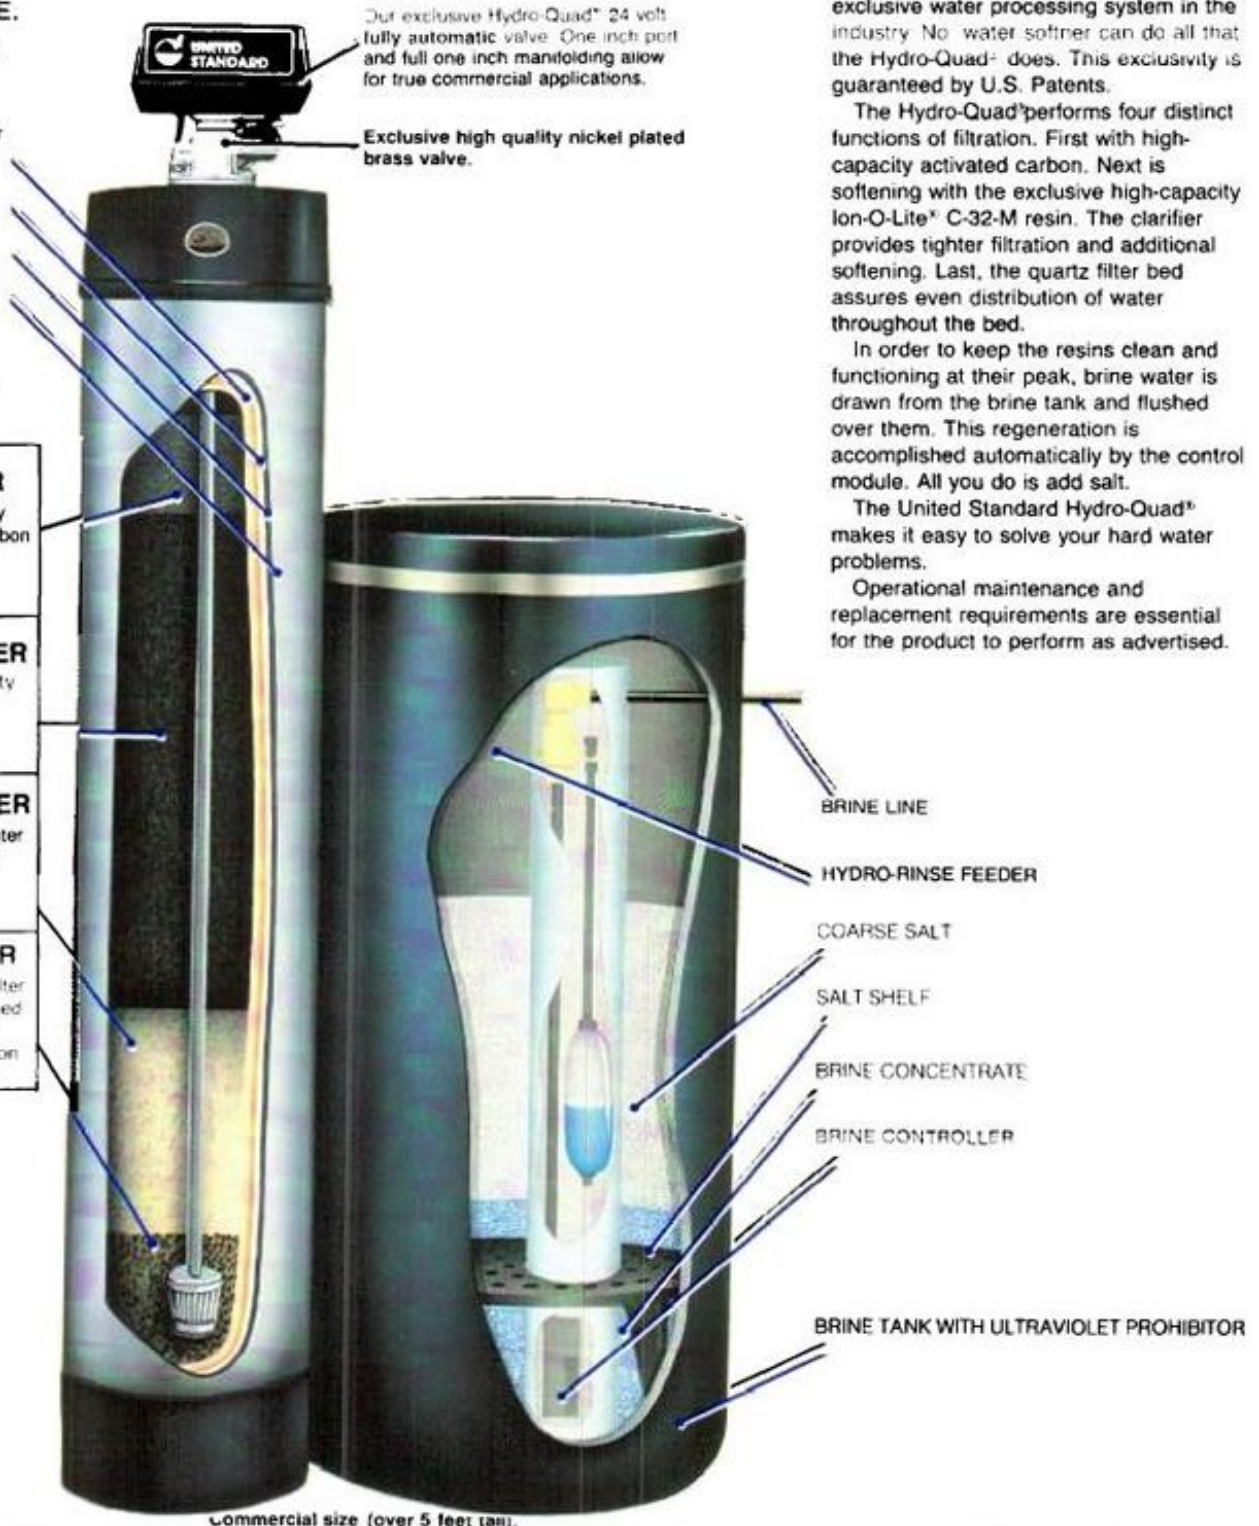

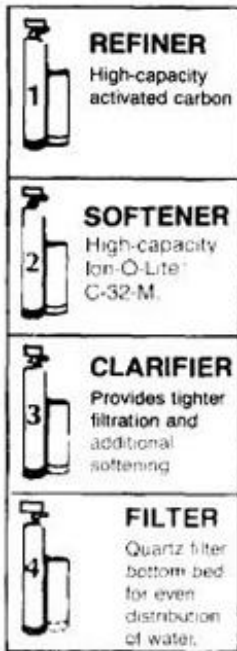

Exclusive U.S. Patent Number
4305826

FOUR IN ONE.

Built to last a
lifetime.

1. Blow-molded Thermoplastic inner tank
2. Thermowound fiberglass tank
3. PVC insulation liner
4. Stainless steel outer cover

FOUR FUNCTIONS IN ONE

The uses for good water are endless and the reasons for owning the Hydro-Quad® and the Ultra-Micron® Filtration System are just as endless!

The Hydro-Quad® is the finest, most exclusive water processing system in the industry. No water softener can do all that the Hydro-Quad® does. This exclusivity is guaranteed by U.S. Patents.

The Hydro-Quad® performs four distinct functions of filtration. First with high-capacity activated carbon. Next is softening with the exclusive high-capacity Ion-O-Lite® C-32-M resin. The clarifier provides tighter filtration and additional softening. Last, the quartz filter bed assures even distribution of water throughout the bed.

In order to keep the resins clean and functioning at their peak, brine water is drawn from the brine tank and flushed over them. This regeneration is accomplished automatically by the control module. All you do is add salt.

The United Standard Hydro-Quad® makes it easy to solve your hard water problems.

Operational maintenance and replacement requirements are essential for the product to perform as advertised.

The contaminants or other substances removed by this Hydro-Quad® water processor are not necessarily in your water.
